Telephone: (+98) 9026872600

LinkedIn: [linkedin.com/in/negar-poormehdi](https://www.linkedin.com/in/negar-poormehdi)

Date & Place of birth: 28/11/2000, Iran

EDUCATION

Bachelor's degree in Biomedical Engineering

Final grade: 16.10/20

Qazvin Azad University
September 2018 - June 2023

High School Diploma

Final grade: 19.36

Shahed High School
September 2014 - June 2018

WORK EXPERIENCE

Front-End Developer

Qazvin, Iran

SRC Studio
May 2022 - February 2026

- Developed cross-platform mobile apps using Flutter and Dart, focusing on high performance and user experience.
- Built dynamic web applications with Angular and JavaScript, integrating RESTful APIs and third-party libraries
- Actively participated in architectural design discussions to enhance scalability and maintainability of projects.
- Mentored junior developers and collaborated closely with designers, backend developers, and project managers to deliver quality solutions on schedule.

Development Team Member

Qazvin, Iran

Mechatronics Research Laboratory (MRL@ Work)
August 2018 - May 2022

- Worked collaboratively within the Vision Department team, gaining hands-on experience in microchip programming and hardware interaction.
- Contributed to vision-related projects, assisting with real-time data processing and system integration.
- Learned effective teamwork, project coordination, and problem-solving in a technical team environment.
- Developed practical skills bridging hardware and software, including working on embedded systems and vision applications.

PROJECT EXPERIENCES

Seat Reservation System - Ozone Cowork

[Website](#)

- Built a web-based coworking seat reservation system, including the admin side for managing users, seat inventory, team pricing, and discount codes.
- Replaced a manual, admin-run booking process with a self-service seat map and real-time availability.

Care Management Application - Akssi

[AppStore](#), [Google Play](#)

- Built a cross-platform Flutter app connecting patients, doctors, and family members, with native Android/iOS integrations for video calls and camera-based vitals.
- Built an interactive body map, custom health graphs, and other features from scratch where existing packages fell short.

Language Learning Platform - Polylo

- Developed the Flutter mobile app for students and the Angular web app for teachers, sharing the same underlying data.
- Built a gamified virtual-city experience, an adaptive flashcard system, and live chat with timed assessments.

Points & Rewards App - Pinup

- Built a Flutter app where users earn points through games and redeem them for coupons from restaurant partners.
- Implemented the points ledger and redemption flow through REST APIs.

Polling & Social Platform - Follett

[Google Play](#)

- Built a Flutter polling app with tiered identity verification, privacy controls, and real-time analytics.
- Later added on-device AI features: face-verification via TensorFlow Lite and an in-app assistant.

TECHNICAL SKILLS

- **Programming Languages:** Dart, JavaScript (ES6+), TypeScript, Java, Kotlin Flutter, Angular, Firebase, WebSockets, REST APIs, GraphQL, Git, CI/CD
- **Engineering Skills:** Architectural patterns, Algorithms, Data Structures, Testing, Agile methodologies

AWARDS

- **IranOpen Robotic Competition - 1st Place** May 2022
- **RoboCup@Work (RCAP 2021) - 3rd Place** November 2021
- **IranOpen Robotic Competition - 1st Place** May 2020
- **RoboCup@Work - Technical Challenge: Cluttered Pick Test** July 2019
- **IranOpen Robotic Competition - 1st Place** December 2018

LANGUAGE PROFICIENCIES

- **Persian** Native
- **English** B2
- **Arabic** B2
